

ICT CELL

ICT cell is a major contributor for managing campus wide IT infrastructure, including computer networking (wired/wireless) and internet facilities, mail, web and application servers and so on. This cell helps people learn the skills and knowledge they need to teach students about information and communication technology.

OBJECTIVES OF ICT CELL

- To create awareness of ICT.
- To assist the students difficulties in e-learning areas.
- Make students solve difficulties in ICT areas. ICT Cell focuses on moving beyond computer literacy and ICT aided learning.
- ICT Cell also helps teacher trainees to learn integrating technological tools for
- teaching and learning strategies.
- To focus ICT as an important curricular resource and as an integral part of education.
- All digital resources are supported and used in the curriculum.
