

## **Stakeholders Feedback Analysis Report**

The curriculum is adapting B.Ed trainees with required skills based on its vision and mission. The curriculum incorporates the varied needs of the local society in its transactions. The curriculum concentrates various student categories and their needs. It enables student teachers capable to handle pupils of varied nature.

The areas where some more improvements are required are the following:-

- Focus of the curriculum in innovating teaching methods
- Cater to the global scenario of teacher education

Cater to the global scenario of teacher education requires advanced technology, continuous professional development, adaptability, collaboration, prioritising student wellbeing. By adopting these strategies teachers can effectively channelise the challenges and make a positive impact on their students' learning experiences by collaborating with colleagues. Education policies and reforms can have a significant impact on teachers' education. The implications of these policies on teaching practice, curriculum design assessment, and professional development have to be understood.

The integration of technology in education has become critical in the current global scenario. Teachers should adapt with digital tools and technologies that enhance teaching and learning experience. This may include using video conferencing, utilizing online resources and educational apps. Keeping up with emerging technologies can help teacher's stay connected and engage with students effectively. This dynamic changing educational environment, professional enhancement with the latest pedagogic approach is necessary for teachers.

### **Suggestions for curriculum revision regarding**

1. Theory
2. Practical, tasks, assignments
3. Internship
4. Examination and evaluation

5. Any others.

- Current theoretical knowledge should be included - try to include relevant content and try to avoid irrelevant content matter - curriculum should be activity oriented.
- Heavy load of practical work should be reduced and avoid unnecessary assignments. Practical work related to technological skills should be included.
- The number of lessons and related practical work should be reduced during internship.
- The evaluation process must be more reliable.
- Reduce the number of observation report.
- Remove beyond class activities and co-curricular activities report and more focus should be given to innovative programmes.

### **Suggestions for curriculum revision regarding addition of other courses.**

1. Certificate courses on personality development, communicative English, documenting and other theatre work related courses should be included.
2. Modify gender paper by including transgender community related topics.
