Kerala, India.**

Policy and Procedure for Waste Management

Sree Vivekananda Teacher Education Centre has a methodical approach to recycling and garbage management. The college promotes excellent sanitation and hygiene among its faculty, staff, and students. SVTEC waste management policy is a guiding document that states the institution's commitment to sustainability, environmental stewardship, and responsible waste management. It establishes guidelines for disposal, recycling, and waste reduction methods and fosters an environmentally friendly culture on campus.

- Our institution has been dedicated to reducing waste generation from all sources by using preventative strategies and practices.
- The institution has a lot of greenery, and all of the staff and students try to make our campus more beautiful.
- In our institution, we have implemented a three-bin system to enable efficient waste segregation.
- Our institutions policy ensures effective coordination and execution by specifying roles and duties for every aspects of waste management in a clear and defined manner.
- In our institution, we actively promote awareness and support waste material reuse and recycling.
- Our institution is committed to making sure that waste is disposed of properly and efficiently in order to minimize any harmful impacts on the environment.
- Every member of the institution, including teaching staff, non-teaching staff and students, should try to generate as little waste as possible.
- Our institution has been dedicated to reducing waste generation from all sources by using preventative strategies and practices.
- The biogas plant is used to gather food waste, which is then turned into manure that is utilized to maintain the campus garden.
- Students are encouraged to maintain vegetable and medicinal gardens.
- On campus, there is a rainwater collection system in place.

-
- **Plastic pouches that are used at the campus are collected monthly by the Haridakarma sena members.**
 - **One time use plastics are restricted at campus. Both staffs and students carry jute and cloth bags along with steel or glass water bottles.**
 - **All classrooms and common rooms have a "Please Switch off Lights and fans" sticker. This makes sure that everyone saves electricity by turning off fans and lights after using them.**
 - **To teach students how to make TLM out of waste items, annual workshops are held every year.**
 - **Students are requested to drop the waste materials in the assigned waste bins.**
 - **It is advised to students that the use of water should be reduced and the use of the available water must be conserved.**
